embrace the future

April 20–30, 2021
Düsseldorf, Germany
www.drupa.com
The sector’s must-attend event

Print and packaging production are essential parts of the show. Highlighted topics for drupa 2021 will again focus on functional/industrial printing, 3D printing, as well as future technologies. drupa stands for cutting-edge technologies and new solutions that can open up new target groups from extremely different markets. International, informative, future-oriented, congenial, and perfectly organized – that’s how exhibitors and visitors characterize drupa – no. 1 for printing technologies.
The fascination of print products is increasing with the steady ongoing evolution of technical possibilities. Print is moving into new dimensions – with new print technologies, with tactile impressions that make fabrics and materials more palpable, with enhancements that open up new dimensions, and with looks and feels that fascinate. drupa live and in real time will demonstrate which printing machines make this fascination possible and with what speed very different print products can be produced.

At drupa 2021, exhibitors will present the trend universes of print and reach new customers and new markets all over the world.

“It is essential that we share our visions in this ever-changing world, and drupa 2021 will be the right place for this. drupa is the leading trade fair and a highlight for the entire industry. We at Koenig&Bauer have already put our heart and soul into drupa and would like to share this with you. Both in 2021 and, of course, in the run-up to our next meeting. Stay tuned, it will be worth it!”

Claus Bolza-Schünemann, Chairman of the drupa Committee and President of the Executive Board of Koenig & Bauer AG
The packaging and labeling sector is growing worldwide, and technological development is forging ahead. Whether a folded box, labels, corrugated board, or flexible packaging, advancements in the field of digitalization are paving the way for innovations in the customizing and personalization area. With new innovative “functional printing” technologies, “smart packages” are gaining importance and changing the industry. New markets are developing and demanding completely new competencies.

At drupa 2021, key trends and outstanding innovations as well as new products will set benchmarks for processes and applications. At drupa, world market leaders will be showcasing their innovations.

Against the background of markets that are growing internationally and increasing demands of the industries and branded companies, packaging production will be one of drupa’s hot topics again in 2021. The touchpoint packaging, forums, and Top international speakers will inspire you in discussions and panels and be driving forces and provide orientation.
“drupa 2016 has completely exceeded Kodak’s expectations. […] The fact that we had already reached our sales target on day 7 – and 168% of the target on day 9 – demonstrates the sector’s trust in wholly new technologies […].”

John O’Grady, Managing Director, Worldwide Sales, Kodak Print Systems Division and Vice President, Eastman Kodak Company

The term “functional printing” covers innovative printing processes for many applications and solutions from different vertical markets. Such as printed electronics: that is, printing conductive plastics or inks on films and foils or other substrates, for example, in entertainment electronics and the automotive sector and increasingly in other industries such as the health care sector.

Also smart packages: intelligent packaging with added functions are printed with special, screen, digital, inkjet, and last but not least, 3D printing on a wide variety of materials, for example, on metal, plastic, films and foils, textiles, glass, ceramics, and wood.

In the textile printing sector, new technologies and products such as digital textile printing machines and inks make numerous options possible for producing textile products that are adapted to the customer’s specific requirements in the residential sector, interior furnishings, fast fashion, decorative fabrics, banners, sports clothing, and many other applications.
The potential of additive manufacturing as a pioneering technology is extremely high in many vertical markets and therefore will be a prominent issue at drupa 2021. Fabbing is ushering in a new era of sustainable production and offers great opportunities for print services providers as well as machine manufacturers and users from, for example, the design and packaging industry, automobile manufacturing, and dental and medical technology. Numerous “classic” drupa exhibitors are working with this technology and will be presenting exciting solutions at their stands. So-called “first movers” will also be on hand.

Again in 2021, the touchpoint 3Dfab+print will be offered with internationally top-class speakers and future-oriented presentations.
Our exhibitor’s innovative and novel interior furnishings will lead the industry into the future again at drupa 2020. As in the past, ideas will turn into prototypes at drupa 2020, prototypes will reach the production stage, and new markets and business models will be opened up.

Autonomous printing will be developed further in the coming years, and digitalized, intelligently networked and automated production processes will shape the future. Cloud computing, the internet of Things, robotics, big data, and artificial intelligence will change the work and market environments.

At the same time, new trends are emerging, such as smart factory or collaborative manufacturing.

“drupa 2016 marked a real turning point for our business. (...) Sales to new and existing customers have far exceeded our expectations.”
Highcon I Elan Varon, Executive V.P. Finance & Business Development
The major themes of automation and robotics, new work flows in the production process, and the next generation of industry 4.0 will be at the center of many discussions. drupa’s supporting programs will also focus on these topics with forums, touchpoints, presentations, discussions, and workshops.

In addition, exhibitors will present innovative printing processes and product solutions for use in industrial production and the packaging and functional and decorative printing application segments.
“[…] We were absolutely delighted by the busy and unbroken stream of visitors to our stand. There’s nowhere else like drupa for bringing together decision makers from all the corners of the globe. The most remarkable things for us were the influence and the decision-making authority of so many of the visitors to our stand. […] drupa 2016 was very eventful for us – overwhelming, but positively so, and we are already looking forward to drupa 2020.”

Ricoh | John Blyth, Market Development Manager & Production Printing Business Group
drupa offers the highest international quality and quantity: 75% of the visitors are executives from top management. They have decision-making power and take part in investment decisions. drupa visitors come from different industries and diverse application areas. A broad range of industries is covered besides print and packaging production.

**print and packaging**
- Printing houses of all kinds and specializations
- Print service providers and suppliers
- Bookbinders, print finishers, and processing companies
- Media production specialists
- Packaging designers
- Product managers
- Production specialists from many different industries such as consumer goods, food, cosmetics, pharmaceutical, or luxury goods

**future technologies**
- International research and development
- University research and teaching
- Major and important trade associations and professional organizations
- Start-ups
- Representatives of a wide range of cross-cutting technologies

**vertical markets**
- Decision makers, engineers, designers, and product managers from industries and sectors such as
  - Consumer goods
  - Food
  - Cosmetics
  - Luxury goods
  - Pharmaceuticals
  - Medicine
  - Electronics
  - Bank and safety technology
  - Glass industry
  - Interior design
  - Logistics

**marketing, publishing, and media**
- Media producers
- Print specifiers, print buyers
- Agencies
- Brand owners
- Product designers from industry
- Decision makers and buyers in the publishing and media industries

**IT**
- High-caliber IT and software experts
- System providers from all sectors of the industry such as premedia/prepress, print, postpress, and converting to packaging

reach
ew target groups

260,165* visitors
thereof 75%* decision makers

behind horizons

**drupa cube**
The innovative event and conference program with international expert speakers as well as touchpoints to the highlight topics offer drupa’s exhibitors and visitors insights, inspirations, and impulses for their businesses and business models of the future.

**dna – drupa next age**
drupa 2021 has established a special new area: dna – drupa next age, the center of disruptive developments. Get inspired by numerous visionaries from wide array of industries!

**drupa touchpoints**
touchpoints on highlight topics such as packaging or 3D fab+print offer drupa exhibitors and visitors impressions, inspirations, and impulses for their businesses and business models of the future.
Düsseldorf is transformed into ‘drupa city’ as it warmly welcomes exhibitors and visitors to drupa, the world’s leading printing technology trade show. The topics and influences from the exhibition travel into the city and extend the exhilarating commercial experience beyond the boundaries of the showground. From the exhibits to the events to the mobile laboratory – drupa city provides added value.

See you in Düsseldorf!
downtown
D-town

Enjoy the drupa city of Düsseldorf on the Rhine. Shop on one of the most luxurious shopping boulevards in the world, Königsallee. Discover architecture of international star architects such as Daniel Libeskind, Richard Meyer, Frank O. Gehry, or David Chipperfield. Enjoy an Altbier with the fun-loving Rhinelanders at the “world’s longest bar” in Düsseldorf’s historic old town. Or have a drink in one of the stylish or trendy bars in Düsseldorf’s “MedienHafen” (MediaHarbor).

The whole world is at home in Düsseldorf when it comes to cuisine. The spectrum ranges from Rhenish specialties such as Flönz or Himmel un Ääd (you have to try it!) to the only Japanese Michelin-starred restaurant in Germany. The city will be waiting for you with many activities for drupa.
